Project Description

The project is to draw a vector portrait of a famous celebrity. This project is intended to familiarize me with a powerful software called adobe illustrator. It covers most of the tools of the software, which are essential. This project Has five milestones to ensure the learning of each component is complete.

What this project covers

It covers various tools (along with shorts cuts to help the workflow) like pen advanced pen tool, shape builder tool, coloring, blending, gradient tool
It covers theoretical basics like understanding shadows, lights, and mid-tone colors
It also covers color theory which is very important to making look the whole project vibrant.
It teaches the basic human structure so that the characters that are made look more realistic

Milestones

1) Practicing essential tools like pen, shapes, alignment, and so on
2) Designing basic logos
3) Drawing intermediate level objects
4) Designing vector characters
5) Drawing vector portrait

Skills learned

1) Drawing vector portrait
2) Advanced pen tool
3) Brushes
4) Understanding light and color pallet
5) Gradients
